About us

Tradition & Experience:

PoloGres is a leading manufacturer of porcelain tiles. Established in the last century, the company has continuously adapted and modernized to remain at the forefront of the ceramic industry. With over 35 years of unparalleled experience in the world of ceramics, PoloGres combines innovation and industry expertise to create products that are technically advanced, environmentally friendly, and aesthetically world-class.

Quality:

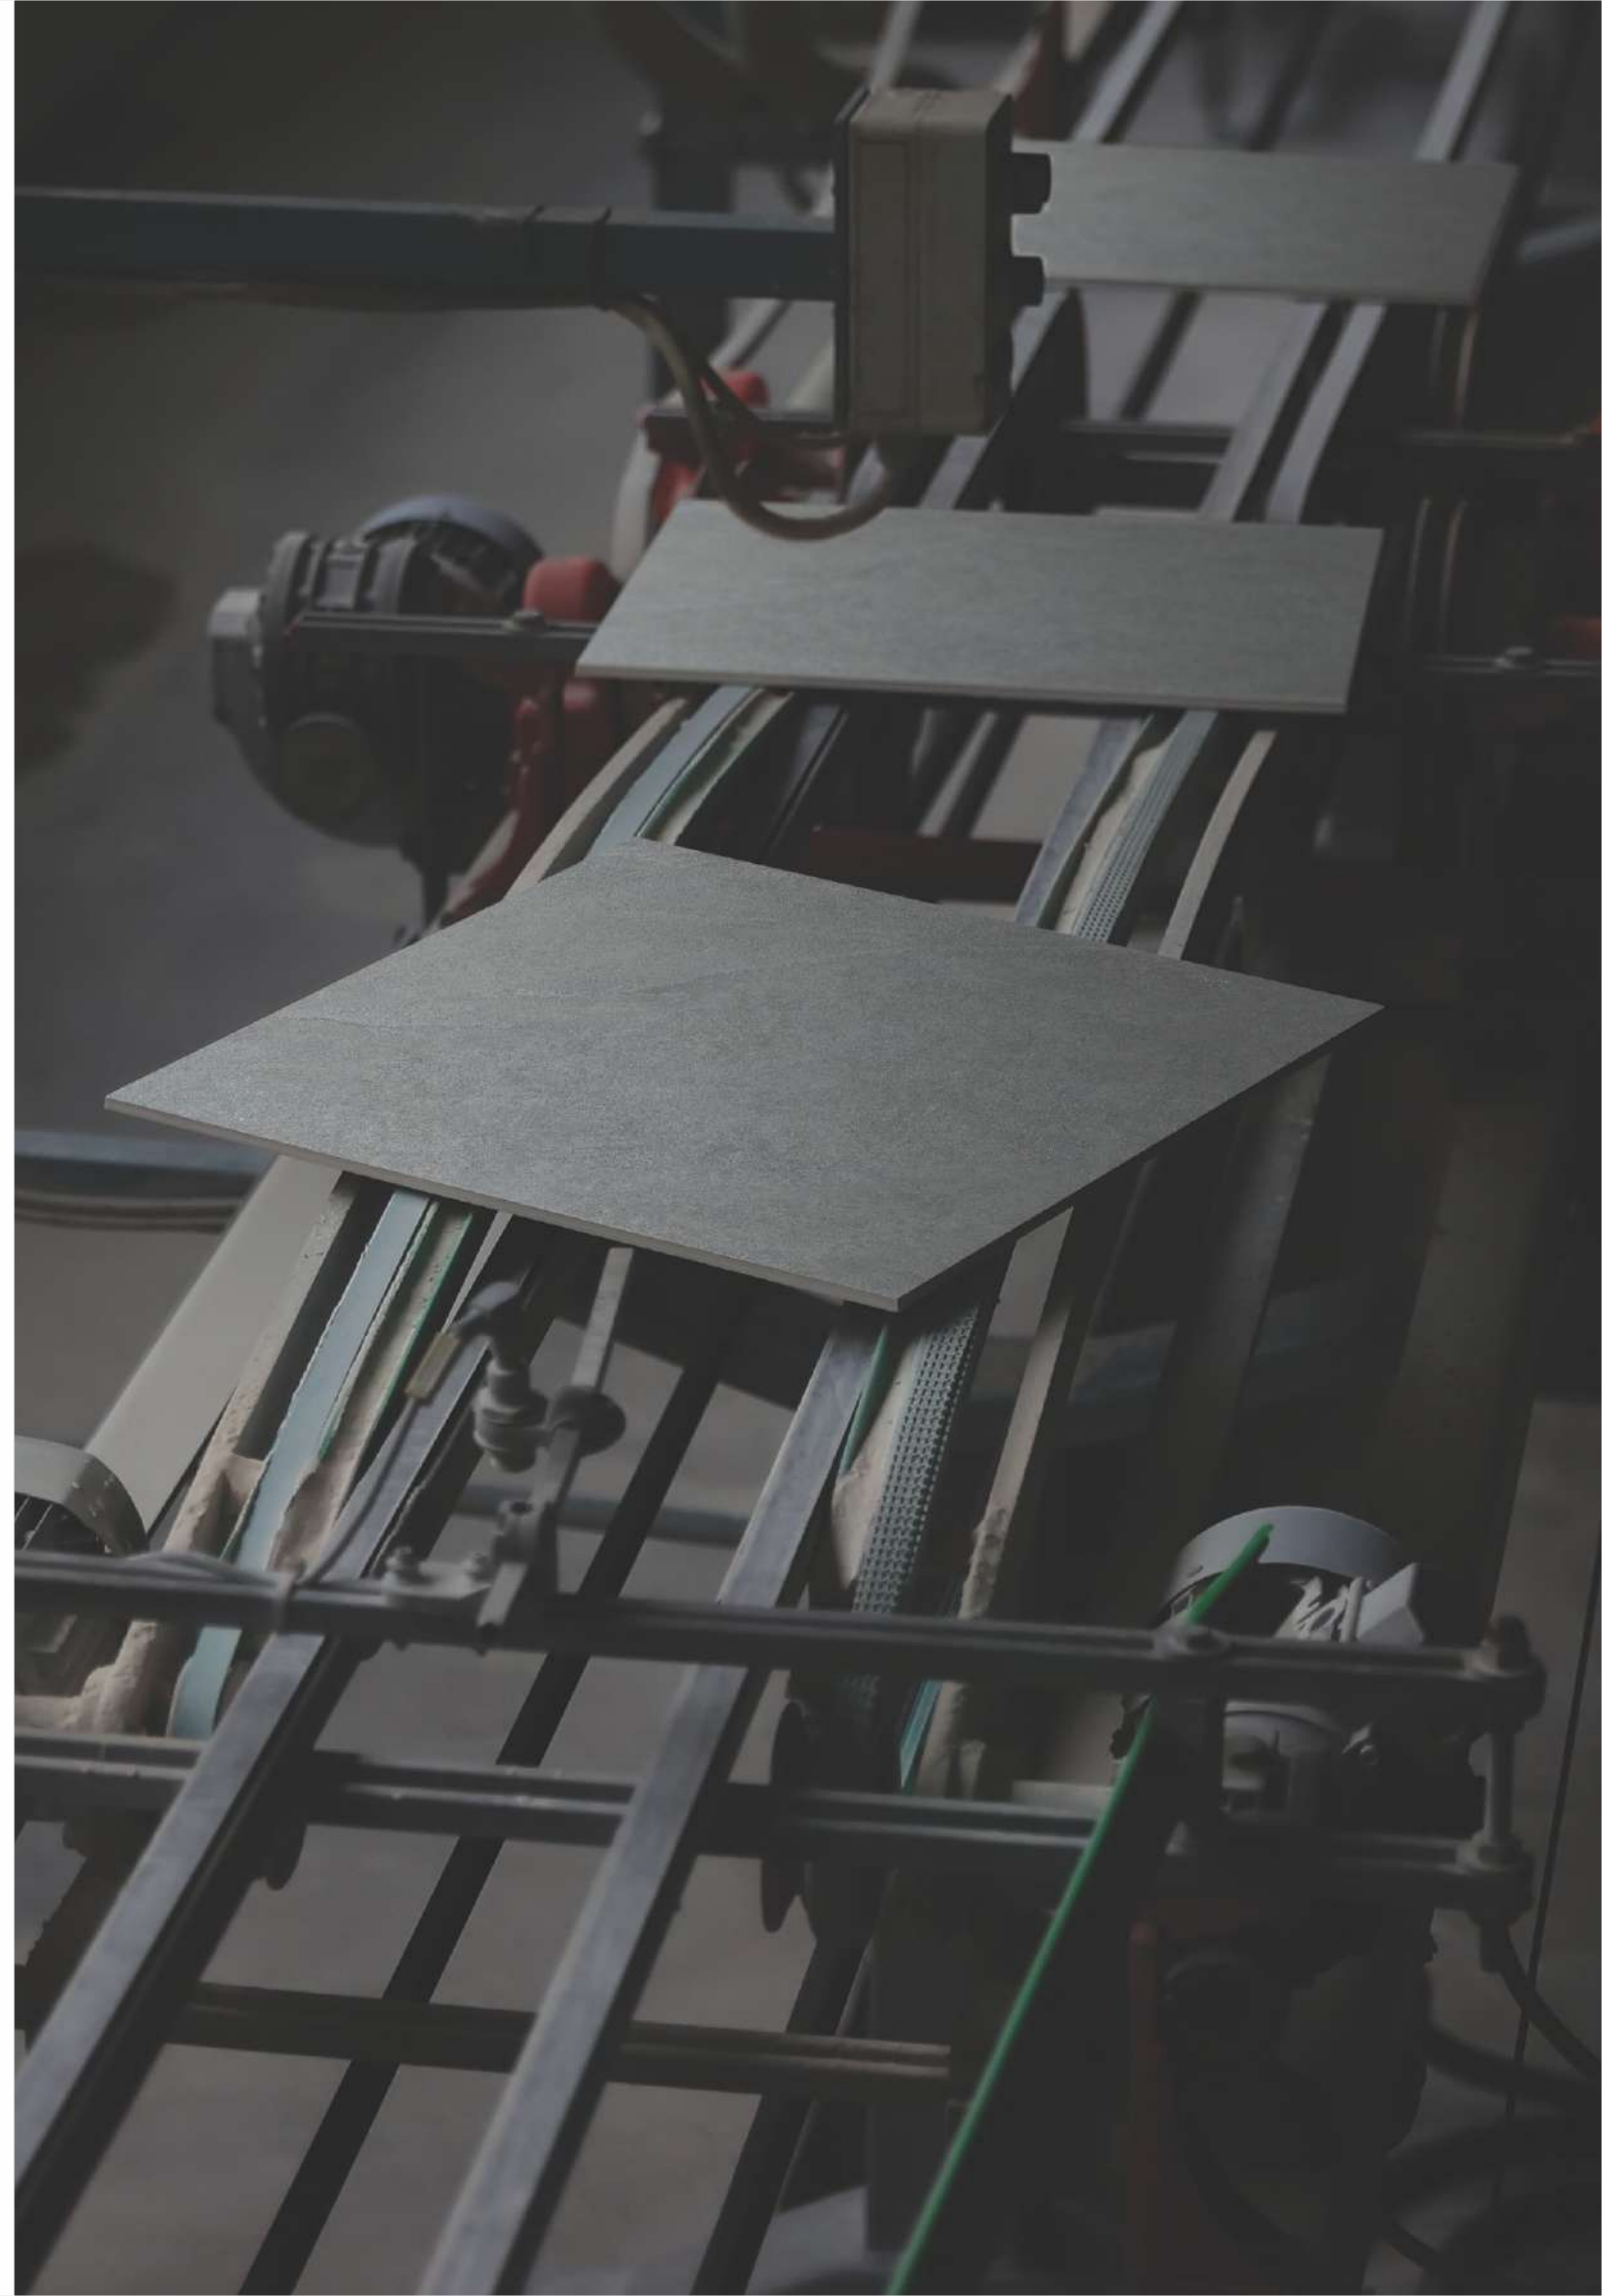

All our pieces are subject to rigorous quality controls throughout the production process. They are tested for mechanical and thermal resistance, chemical resistance of the glazing, the purity of its components, and the stability of its forms. In brief, an integral quality control, from the selection of clays to the final packaging, is done to ensure the product's perfect condition.

Future and Innovation:

Since the beginning we have been committed to innovation in production processes without losing our traditional character. PoloGres has facilities adapted to meet the needs of an increasingly professional and demanding market. Our R & D team is constantly researching to generate products that offer high-end technical and aesthetic features. Our project for the future is a clear commitment to face the new challenges that the market demands in terms of sustainable architecture.

Extreme Indoor Surfaces

Introducing Surface Collection 2025-26, the ultimate choice for indoor surfaces. These porcelain surfaces offer unmatched durability and are resistant to thermal shock, ensuring they withstand extreme weather conditions. Designed with anti-slip technology, they provide a safe and secure surface even when wet. Plus, their UV resistance ensures lasting colour vibrancy, making them a perfect blend of style and strength for any interior space.

Low Maintenance

Chemical Resistant

Easy to Clean

Thermal Shock Resistant

Waterproof

Stain Resistant

Hygienic Surface

Look Board

4 inspirations to instill the right mood for every project, satisfying personal tastes and in full harmony with the surrounding environment.

Our desire to reconnect with nature drives us to constantly research and develop new patterns. Multicoloured or minimalist stones, polished and textured marbles, white and chromatic chips terrazzo, concrete effects, and delicate colours play the star role in what has become a popular trend: indoor spaces that offer well-being and a lifestyle to be savoured.

Installation Guide

1. Pre-Installation Checks:

- Verify hue, size, and material choice before installation; claims are not accepted for visible defects post-installation.
- Order 10-15% extra material for repairs and color consistency.

2. Preparation:

- Use materials from multiple boxes to ensure a uniform look, especially for products with color shading (V>2).
- Ensure the substrate is flat, stable, dry, and temperature-compliant (+5°C to +35°C).

3. Adhesive Guidelines:

- Prefer high-performance adhesives (EN 12004) for porcelain stoneware.
- Use the "double spreading" method for tiles longer than 60 cm to ensure a compact adhesive layer.
- Avoid marking the tile surface with pencils or permanent markers.

4. Joints and Grouting:

- Use joints of at least 2 mm for rectified products and 3 mm for unrectified tiles.
- Stagger rectangular tiles in a running bond pattern by 10-15 cm to avoid alignment issues.
- Remove excess grout immediately during application.

5. Installation on Existing Floors:

Preparation:

- Ensure the surface is clean, even, and free of wax or residues.
- Respect existing expansion joints and maintain a 2 mm joint width.

Adhesive Application:

- Use the "double spreading" method with additional adhesive for edges and corners.
- Beat the surface gently to eliminate air gaps.

6. Installation of Wall Coverings:

Preparation:

- Ensure even surfaces and clean substrates.

Adhesive Application:

- Spread adhesive with a spatula and apply slabs carefully to avoid air gaps.
- Use appropriate adhesives, especially for outdoor installations.

Cleaning And Maintenance

1. For Cementitious Grouts (Class CG):

- Use a solution of water and buffered acid (e.g., Deterdek Pro, Keranet) to clean excess grout.

2. For Epoxy Grouts (Class RG):

- Remove residues before hardening using recommended products like Fuga-SOAP Eco or Cr10.

3. General Cleaning:

- Conduct a sample cleaning test before applying to the full surface.
- Avoid detergents on aluminum, steel, or natural stone elements.

Routine Maintenance

- Use neutral detergents diluted in hot water for daily cleaning (e.g., Fila Cleaner, Tile Cleaner).
- Avoid waxes, oily soaps, and hydro-oil repellents unless necessary.
- Never use hydrofluoric acid (HF) or its derivatives, as they irreparably damage ceramic products.

Matt Finish

- Daily Cleaning: Use a neutral detergent diluted in warm water; rinse thoroughly to avoid residue.
- Stain Removal: For tough stains, use pH-neutral or mildly alkaline cleaners.
- Avoid: Waxes, oily soaps, and impregnating agents, as they are unnecessary for matt tiles.
- Protection: Place mats at entry points to reduce dirt and abrasion.

Polished Finish

- Daily Cleaning: Clean with a soft cloth and neutral detergent diluted in warm water; ensure thorough rinsing and drying to maintain shine.
- Grout and Stain Removal: Clean immediately using recommended grout cleaners (e.g., Fila Cleaner, Keranet). Avoid abrasive tools.
- Special Care: Remove excess grout or cement before it dries to prevent surface scratching.
- Avoid: Abrasive sponges, acidic cleaners, or hydrofluoric acid that can damage the polished surface.

Note

- For commercial and heavily used surface areas such as airports, hospitals, supermarkets, and any public spaces with heavy foot traffic which are thus subject to considerable soiling, it is necessary to use automatic cleaning machines with suction of the washing liquids.
